Job Description

Senior Project Manager will report to the President of Pacifco Energy Vietnam developing and managing renewable energy projects in Vietnam. Primary responsibilities (but not limited to) are:

- Sourcing new development opportunities (offshore/onshore wind, solar power)
- Negotiate purchase/lease contracts with ex-developers, landowners, and local authorities
- Leading in project management for all projects including time line / vendor / stakeholders
- Lead a local permitting process including provincial authorities, MoIT, EVN, Government Office
- Work with Investment Manager to close project financing by providing necessary projections/ deal terms etc.
- Negotiate/manage EPCI contracts (Engineering-Procurement-Construction-Installation)
- Lead and build the engineering & project management team

Requirements

- Strong project and development type project management track records
- Ability to lead negotiations with local stakeholders, vendors, financial institutions
- A comprehensive knowledge of the energy market in Vietnam with good reputation to MoIT/EVN/Government Office/Provincial authorities
- Strong financial analysis capabilities to screen initial investment opportunities
- Power Generation & Transmission Experience (minimum 5 years)
- Overseas education with minimum Master degree
- Energy Engineering background (Project Management competence is a plus)
- Business English: proficient in reading, writing and speaking/persuasive skill is a must
- Extensive travel including long term site work (some time in weekend) is required.
- Responsible and a team player. Good reference is a must.
- Similar management experience (minimum 5 years) in multinational organizations

Please send resume/application with expected remuneration and passport photo to

son.trinh@pacifcoenergy.vn (0902930388) or Human Resource Manager of Pacifco Energy Vietnam, Unit 1103A-B, 11th floor, Me Linh Point Tower, 2 Ngo Duc Ke street, Ben Nghe ward, District 1, Ho Chi Minh city, Viet Nam latest 29th April 2020. www.pacifcoenergy.vn; www.pacifcoenergy.com

Pacifco Energy is an American Investor of Renewable Energy, one of the largest renewable energy developers in Japan with more than 1,000 MW solar and 1,000 MW offshore wind power projects under operation and construction/development with \$ 3.5 billion in debt and equity financing since 2012. In Vietnam we based in Ho Chi Minh city and built and are operating 40MW solar power plant in Mui Ne (Binh Thuan) and are developing some bigger wind energy and solar power projects
